DJERBA FRANCOPHONY CONGRESS CENTER TUNISIA

FROM THE 21st TO THE 23rd OF SEPTEMBER 2023

الجمعية الجزائرية لطب القلب
Société Algérienne de Cardiologie
Algerian Society of Cardiology

Welcome in Djerba, the dream Island,

Dear esteemed colleagues, healthcare professionals, and distinguished guests,

It is with great pleasure that we gather here today for this joint **MAGHREBIN-PASCAR** Cardiology Meeting, organized by **STCCCV** and **AMCV**. This 2023 congress edition is a momentous occasion that brings together the brightest minds in the field of cardiology with the support of global and regional prestigious societies: **ESC, ACC, AHA, PASCAR, SFC, SMC, SAC, SMAC, LSC, KSA, EgySC, ECS, EAPCI, EHRA, SSC, ICSC**etc.

As we embark on this journey of knowledge exchange, innovation, and collaboration, we find ourselves at the crossroads of discovery and progress in the realm of cardiovascular health that we have to adopt and adapt to the African context. In a world where heart disease remains one of the leading causes of mortality and morbidity and where Africa is the fastest human growth area, our collective commitment to advancing the practice of cardiology has never been more crucial in a context of scarce resources.

The challenges we face are multifaceted, from addressing the rising burden of cardiovascular disease in Africa to exploring groundbreaking therapies, diagnostic tools, and preventive strategies. In this dynamic and ever-evolving landscape, our pursuit of excellence and dedication to patient care drive us forward. Over the course of this meeting, we will be privileged to hear from some of the foremost experts in cardiology and key opinion leaders, who will share their insights, experiences, and the latest research findings.

We will engage in spirited discussions, foster new connections, and cultivate ideas that will shape the future of cardiovascular medicine. In addition to talks, practical workshops and simulation village for coronary and heart structural percutaneous procedures will enhance practical skills of interventional cardiologists and CV surgeons. The most realistic simulators from simple to complex procedures are accessible onsite with the support of the best device companies in the world.

STCCCV.2023 TOGETHER WITH AMCV

As we come together in this collaborative endeavour, let us remember the profound impact our work has on countless lives. Each advancement, each breakthrough, each exchange of knowledge has the potential to transform the trajectory of heart health for individuals, families, and communities around the world.

To make this meeting an endless learning moment, the majority of talks will be accessible online via our www.stcccv.org.tn website. On behalf of the organizing committee, we extend our heartfelt gratitude to all of you for your dedication to the field of cardiology and for your presence at this memorable meeting. We are more thankful to the pharmaceutical and device companies that didn't manage any financial effort and support to make this congress a common success. Together, we will chart a course towards a healthier future, where heart disease is better understood, more effectively treated, and ultimately prevented.

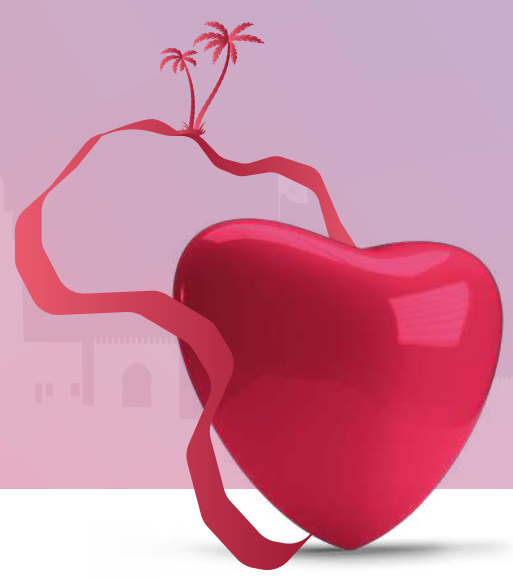

Let us embark on this remarkable journey with enthusiasm, camaraderie, and a shared vision of a world where every heartbeat counts. Thank you, and may this Cardiology Meeting be a resounding success!

Sincerely,

Congress presidents,
On behalf of the organizing committee
